

## Query By Name

When searching by name, additional information is now displayed on the results page to provide more detail for selection. A row of information is displayed to the screen for each case in which that person is involved, as shown below:

## One Character Name Query

In previous versions of CM/ECF, two characters of the last name were required for a name search on the Query screen, making it impossible for a user to search for a person with a single-character last name. With release 4.1, if a single character is entered into the last name field, it is evaluated for the exact name match only. A message appears on the screen informing the user that only exact matches will be found, as shown below:

The screenshot shows the 'Query' interface. At the top, a warning message states: 'Warning: you will be billed for the total number of pages (this report is not subject to the 30-page limit on PACER charges)'. Below this is a 'Search Clues' section with several input fields: 'Case Number', 'Last / Business Name' (containing the letter 'a'), 'First Name', 'Middle Name', 'SSN / ITIN', 'Tax ID / EIN', and 'Type'. There are also checkboxes for 'Open cases' and 'Closed cases'. At the bottom left are 'Run Query' and 'Clear' buttons. A 'Message from webpage' dialog box is overlaid on the right, containing a question mark icon and the text: 'This search will return only matches with single-character last names. Continue?'. The dialog has 'OK' and 'Cancel' buttons.

Searching with a wildcard and one character (a\*) is not permitted.

## View Document

There was previously no way for internet to view a document without first viewing the docket

report. Now, a “**View Document**” link on the Query menu allows you to enter a document number in the case and view the document without having to run a docket sheet. This feature will enable PACER users to eliminate charges for first accessing the docket report.

Users must know the document number to access the PDF document in this manner.

## Query Billing

A warning message has been added to the Query search screen to remind PACER users that there is no 30-page PACER billing cap on the information returned from these searches.
